

**TopSOC Information Security Limited** is formed by security professionals in Macau and provides Managed Security Services (MSS) including Security Operation Centre (SOC), professional security services including penetrating testing and computer forensic and selling and deploying Data Voyager's Logbox, Sophos, and Palo Alto solutions. We believe an ongoing monitoring with specialized security experience is required to neutralize the fast-growing cyber-attacks.

The team is formed by few security professionals from Macau with 2 strategic security partners (eWalker and Data Voyager) from HK. Many members in the team have more than 15 years extensive experience in information security, Cyber Security Forensic and Security Monitoring product (SIEM). We aim to provide effective security services based on our self-developed tools to take full control of security incidents in Monitoring, Threat Hunting and Detection, Incident Response and Forensic in order to minimize the security risk of our clients. We consider the team works like the security guards at the last-ditch to protection our clients interest in the cyber world.

**Your Cyber Security Team**

## Hacking Business Model

Hackers can monetize from:

1. Selling data
2. Ransomware
3. Cryptojacking / DDOS

Have you been asked for Ransom before?

Do you know if your data has been stealing

Do you know if the hacker is using your computer for DDoS or Crypto Mining?

## What can TopSOC help you?

TopSOC offers a continuous monitoring of your environment by using our in-house developed intelligent SIEM with our security analysts. Our team will manage including triage, assess, hunting, neutralize any potential suspicious events and try to stop the hacking activities at early stage of the hacking lifecycle in order to minimize your security risk.

## Managed Security Services
